Support Multilingual Learners with EPS Reading Assistant

Reading Assistant Provides Support for Multilingual Learners with Personalized Reading Practice + Tutoring in English and Spanish

The journey to reading success can be challenging for beginning readers, and even more so for multilingual learners. Our AI-driven EPS Reading Assistant uses voice-recognition technology to provide adaptive reading practice for all students, and delivers real-time feedback and micro-interventions that accelerate literacy gains. With content in both English and Spanish, this powerful tool maximizes success for multilingual readers.

Accelerate Your Multilingual Students' Reading Skills with EPS Reading Assistant
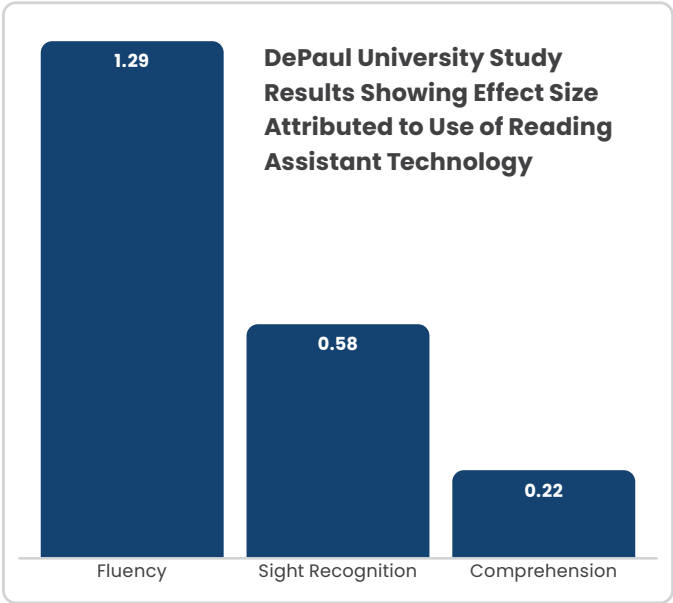

Research shows that the technology behind Reading Assistant works for all students, and is especially powerful for multilingual learners. An ideal complement to any reading program, this online tutor offers additional advantages for teaching multilingual students, including:

- ✓ **Spanish-language screening** — able to gauge dyslexia risk based on a student's oral reading in Spanish.
- ✓ **Spanish-language assessments** — based on the proven, reliable and valid Tejas LEE assessment.
- ✓ **Micro-interventions & tutoring** — that follow science of reading guidelines and include additional syllabic support in Spanish.
- ✓ **Research backing** — with proven results from a DePaul University study showing significant gains in fluency and word accuracy for English language learners.

Even More Effective with Multilingual Learners

A study by DePaul University found that multilingual students in Chicago using the Reading Assistant technology saw significant gains in fluency and word accuracy.

DePaul University Study Results Showing Effect Size Attributed to Use of Reading Assistant Technology

Fluency	Sight Recognition	Comprehension
1.29	0.58	0.22
